

Product Change Notification Letter

Date: 9/24/24

PCN#: 1003 Rev 1

Title: Product Labeling

Affected Products: All applicable product, see attached list for all PNs

Effective Date: 9/24/2024

Product Identification: Moog Protokraft products

Description & Purpose: Moog Protokraft is changing the part marking method from direct ink marking to UID label marking. UID labels could contain Human Readable Information (HRI) only, Machine Readable Information (MRI) only, or a combination of HRI and MRI. This will be dependent upon the size of the product. The labels are compliant IAW MIL-STD-130 part marking requirements. With more industries implementing digital receiving (scanning), the UID label allows for quicker/easier processing. This change is also being implemented as an environmental initiative to reduce hazardous waste, and plating damage caused by ink removal.
